

28 Dec 04: Welcome

There have been a number of small but glaring corrections posted over the past 3 days. The most notable change today is a face lift for the Guest Book. We got only two responses to the Black or Maroon text question and one was White.

White is a bit more difficult, so we will try Black first. I also increased the font size 2 points. We are working on a graphic to better match the header area to the rest of the site. Please – stick with Black(?), go back to Maroon(?), or try White(?) - let me hear from you!
